REDBELLY DAO TASK BOARD · TASK-20

CANONICAL REFERENCE

Where to Buy & Trade RBNT

Every live venue for native and wrapped RBNT, checked directly and cross-referenced against independent sources.

LAST VERIFIED AUGUST 21, 2026

RBNT trades in two forms. **Native RBNT** is the token on Redbelly Network's own chain, tradeable on five centralized exchanges and directly on-chain through Reddex. **Wrapped RBNT (wRBNT)** is a separate, bridged token used for DeFi trading on Ethereum, Base, and Solana. No live futures or perpetual market for RBNT was found on any tracked exchange as of the date above. If one appears elsewhere, verify it directly. It is not confirmed in this document.

01 NATIVE RBNT: CENTRALIZED EXCHANGES

Five exchanges list native RBNT against USDT or USDC. All five were checked directly on their own trade pages.

EXCHANGE	PAIR	STATUS	LINK
Gate	RBNT/USDT	● LIVE	gate.com/trade/RBNT_USDT
MEXC	RBNT/USDT, RBNT/USDC	● LIVE <i>Highest volume of the five.</i>	mexc.com/exchange/RBNT_USDT
BYDFi	RBNT/USDT	● LIVE	bydfi.com/en/spot/RBNT_USDT
WhiteBIT	RBNT/USDT	● LISTED, THIN <i>No trades seen in the hours before verification. Check order book depth before sizing a trade.</i>	whitebit.com/trade/RBNT_USDT
BitMart	RBNT/USDT	● WIND-DOWN <i>BitMart announced an orderly wind-down on 26 July 2026. New orders and deposits</i>	bitmart.com/trade/RBNT_USDT

are already
suspended. All trading
ends 26 August 2026,
01:00 UTC. Do not
treat this as an
ongoing venue.

02 NATIVE RBNT: REDBELLY CHAIN DEX

Reddex is the official liquidity hub for Redbelly Network. It is the only venue confirmed for trading RBNT and wRBNT directly on-chain, without bridging.

TOKEN	PAIR	STATUS	LINK
RBNT	RBNT/USDC.e	● VERIFIED	reddex.io/swap
WRBNT	WRBNT/USDC.e	● VERIFIED	reddex.io/swap

WRBNT on Redbelly: 0x6ed1F491e2d31536D6561f6bdB2AdC8F092a6076

03 WRAPPED RBNT: CROSS-CHAIN DEX

wRBNT is a bridged representation of RBNT, not the same token. A change to one does not mean the other has changed. Confirm which one a venue actually lists before comparing it to this table. wRBNT trades on three chains: Ethereum, Base, and Solana.

Ethereum WRBNT/ETH

Price impact at 10k: 86.77%

TRADE ON **Raydium**

Effectively unusable at this size.

04 BRIDGES

Two official routes move RBNT and stablecoins between Redbelly Network and other chains.

Lucid Labs Bridge

Official route for bringing RBNT and wRBNT back to Redbelly Network from nine chains: Ethereum, Arbitrum, Optimism, Base, BSC, Polygon, Avalanche, Sonic, and Solana. The Solana route is currently unavailable.

bridge.lucidlabs.fi

Reddex Bridge

Official route for bridging USDC and USDT into Redbelly Network. Runs on the same Lucid Labs and Polymer infrastructure. Flat 1% fee.

reddex.io/bridge

05 SPOT VS FUTURES

No exchange currently lists an active RBNT futures or perpetual contract. Some exchange marketing pages reference futures trading in template copy that appears on every listed token regardless of whether a market exists. That copy is not evidence of one. A futures listing appearing or disappearing anywhere is not the same event as a spot listing changing, and the reverse is also true. Check each independently before treating one as confirmation of the other.

CAUTION No ownership. Leverage risk.

06 HOW THIS WAS VERIFIED

Every CEX venue above was checked directly against its own trade or listing page, and cross-referenced against at least two independent sources: CoinGecko's live markets table, CoinCodex's exchange listing, and CoinMarketCap's contract fields.

Every DEX and bridge contract address was matched against CoinMarketCap's own contract listing and confirmed on-chain via the relevant block explorer: Etherscan, BaseScan, Solscan, or the Redbelly explorer. Price-impact figures for each wRBNT venue were read directly from that venue's own quote at the trade sizes shown.

This is a dated snapshot, not a guarantee. Listings and liquidity at this market size can change within days. Reverify each link, contract address, and price-impact figure before relying on it for a transaction.
